

Five Step Needs Analysis

Step 1: Describe your brand, culture, and your most important values. *(The best systems help hold organizations accountable to stated expectations)*

Step 2: What are your manufacturing processes? *(IMM, Roll form, Extrusion, Milling, Stamping, Coating, CNC, Assembly, Packaging, etc.)*

Step 3: What systems interface with most team members? *(QuickBooks, Nice Label – shipping, Google sheets, Quality Software, ERP, CRM systems)*

Step 4: What are your biggest areas of pain? *(Missing visual data for decision making, Dashboards, linking assembly stations to print database, Cascading project lists from work cell to individual engineer, multiple disconnected spread sheets)*

Step 5: What are your known opportunities? *(Visual plant gages for production and inventory demand, eliminate double entry, automate a task, integrate CRM info with financial forecasting models, ingraining culture/brand/behaviors)*

We evaluate our discussion points and meet to review your personalized app suite solution.

Custom Solution

The original application your team had to have unique to you.

Freedom Tools

Customizable software developed for small to midsized manufactures.

Off The Shelf (OTS)

Pre-packaged existing software uses "as is" out of the box.
