FreedomDev
SENSIBLE SOFTWARE

Capabilities Statement

Company Snapshot

Software development and support. (1) U.S. based team with experience in 100+ languages/technologies. (2) Flat-rate time and material billing. (3) Integrate, migrate, build new, and consult on software development integrations / lifecycle / architecture.

Core Competencies

- New software development from ideation to implementation
- Integration between systems, and existing systems bug fixes
- Existing software systems performance optimization(s)
- Database(s) performance optimizations, administration and configuration. Migrations between databases, systems, hosting environments, and technology stacks
- Mobile-optimized web applications, and native mobile applications
- Management of hosting solutions. On premise or cloud, with emphasis on Azure
- Strict adherence to your actively supported frameworks, capture new security patches, performance improvements, and making solutions accessible to new developers
- Rigorous time-tested software development lifecycle, incorporating agile practices; feature definition, local development, automated testing, end-user testing, continuous integration and deployments

Differentiators

- **100+** A team experienced in 100+ languages/technologies
- Assigned project manager(s)
- Experience in manufacturing
- Simply hourly billing available

Past Performance

Innotec   2016 - Present

- Designed, implemented, and maintain an exhaustive custom ERP system critical to large scale operations providing real-time financial data, EDI, and Customer Portal
- Architecture of system was originally developed using ASP.NET MVC, .NET Framework, and SQL Server
- More modern development emphasizes migration and integration with legacy system to utilize Angular, ASP.NET Core, and SQL Server

Scott Group Studio   2021 - Present

- Designed and implemented a system to supplement and integrate their legacy system(s), utilizing a mix of architectures; Angular, ASP.NET Core, SQL Server, jQuery, and Bootstrap
- Designed advanced AI-driven web application for internal and external users to find rugs using search algorithms powered by AI with solutions provided by Microsoft Azure
- Developed a complex quoting pricing system; workflows / ordering / sample request

Pertinent Codes

NAICS: 541511 - Custom Computer Programming Services

CAGE CODE: oYVQ9

UEI: QS1AEB2PGF73

Microsoft SQL Server, PostgreSQL, MariaDB, ORACLE DATABASE, MySQL

Key Clients

iCademy GLOBAL Online Education, INNOTEC, ENVIZION IT, koops, Code Blue, MasterTag
